ASSESSMENT

The music already has an audience

His Alan Walker collaborations rank among his most-saved tracks on both major streaming platforms.

The artist brand is still untapped

About 300 followers per platform shows listeners know the songs but not yet Vikkstar himself.

Clear room to grow

Official accounts and local content would turn this Alan Walker–driven exposure into his own fanbase and give promoters evidence for China bookings.

Outlook: **early stage, high growth potential**

Thank You
